G-Series Cloud, Powered by Glassware 2.0, Containerizes Applications on Microsoft Azure, Extending Them to Any Mobile or Desktop Device

Sphere3D

MICROSOFT AZURE APP BUILDER PROFILE: SPHERE 3D

Sphere 3D delivers containerization and virtualization technologies along with data management products that enable workload-optimized solutions. We achieve this through a combination of containerized applications, virtual desktops, virtual storage and physical hyper-converged platforms. Sphere 3D allows organizations to deploy a combination of public, private or hybrid cloud strategies while backing them up with state-of-the-art storage solutions.

WHAT WE OFFER

G-Series — Powered by Glassware 2.0™ — On Microsoft Azure Cloud

REDUCE TOTAL COST OF OWNERSHIP

75%

LOWER COST   INCREASE SCALABILITY

DELIVERING NATIVE APPLICATIONS TO **ANY DEVICE**

NATIVE APPS FROM LEGACY TO CURRENT

Glassware 2.0™

FAST AND EFFICIENT CONTAINERIZATION OF APPLICATIONS

ANY APPLICATION
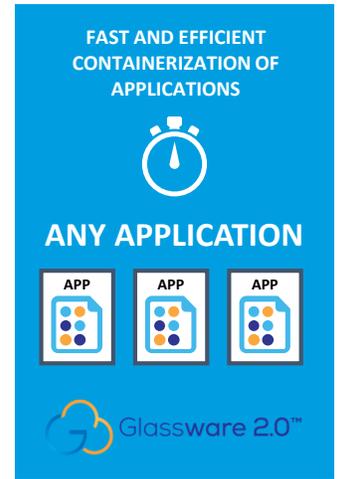

APP   APP   APP

Glassware 2.0™

G-Series Cloud powered by Glassware 2.0 containerizes existing Windows applications with ease. Customers can rapidly deploy the solution as a service on the Microsoft Azure public cloud platform to modernize and mobilize IT applications on any desktop or mobile device.

Reduce TCO by 75% with the breakthrough density of the G-Series Cloud architecture. Open up the business case for virtualization of any Windows-client application. Sphere 3D's containerization approach significantly lowers desktop computing costs.

Extend useful life of applications with unique containerization technology that removes Windows applications' dependency on the underlying operating system. Both new and legacy applications can be mobilized and deployed to almost any end user device without complex code changes.

Fast and efficient implementation that easily containerizes Windows applications in minutes using an intuitive, wizard-based orchestrator that requires neither specialized virtualization or development skills nor incremental infrastructure investment.

WHAT CUSTOMERS ARE SAYING

"Working with Sphere 3D has enabled us to offer our school districts a cost-effective solution for delivering digital learning applications across any device platform, including Google Chromebooks, iPads and other mobile devices." – Melissa McClatchy, Coordinator of Technology Integration for Region 6 ESC

Microsoft | Go-To-Market Services

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC
Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE
Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA
Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL
Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE
Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES
Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH
With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
